

## Cleaning HydroClear® Glass

When used in shower and bath enclosures, keep HydroClear® glass looking better between regular cleanings by using a soft rubber squeegee to remove water after each use. This will also make regular cleaning easier.

Hand cleaning of HydroClear® glass may be accomplished using the following recommendations:

- It is important to note that HydroClear® is not self cleaning, or scratch resistant.
- Thoroughly wet the surface of the glass with plain water to remove surface contaminants.
- Use a soft cloth or a sponge (Magic Eraser® is also permitted) and a commercially available glass cleaner to clean the glass. After cleaning, rinse thoroughly with water and dry. A soft rubber squeegee or clean cloths may be used to dry the glass. The more frequently you clean the glass the easier the cleaning process will be each time.
- Regular cleaning with traditional non abrasive household cleaners may be used for optimum results such as Clorox® Glass Cleaner, Fantastik® Cleaner, Lysol® Bathroom Cleaner, Mr. Clean® Bathroom Cleaner, Magic Eraser®, Invisible Glass Cleaner®, Sprayway® Ammonia Free Glass Cleaner, Tilex Shower Cleaner®, Windex® Ammonia Free Glass Cleaner, Windex All Purpose Cleaner with Vinegar, Soft Scrub® and Scrubbing Bubbles® Shower Cleaner are acceptable. Additionally, a mixture of 50% water and 50% white vinegar may be used.
- For especially difficult cleaning, use Soft Scrub® All Purpose and a Magic Eraser®.
- Never use abrasive cleaners or chemicals on the coated side of the glass. Examples of these cleaners or materials include, but are not limited to: Ajax®, Comet®, CRL Sparkle, CLR Calcium, Lime and Rust Remover®, Lime A Way® Hard Water Spot Remover, Bon Ami, Bar Keepers Friend, cerium oxide, polishing compound and any product containing hydrofluoric or phosphoric acid.
- Never use any type of metal scrapping device, razor blades, Brillo® Pads, steel wool, abrasive Scotch Brite® pads or other abrasive pads or devices on the HydroClear® surface.
- Always use a soft cloth, paper towel or sponge.
